

Performance-based (Classroom Activity)

English Year 2

Module 8: The Robot

Activity: Robot Show and Tell

Instructions:

1. Divide the students into small groups.
2. Each group will be assigned a specific body part or feature of a robot (e.g., head, arms, legs, eyes, etc.).
3. Provide each group with craft materials such as cardboard, paper, markers, and glue.
4. Instruct the groups to work together to create a model of a robot incorporating their assigned body part or feature.
5. After the students have completed their robot models, allow time for them to prepare a short presentation.
6. Each group will take turns presenting their robot to the class.
7. In their presentation, the group should describe their robot's assigned body part or feature, explain its purpose or function, and demonstrate any special abilities it may have.
8. The rest of the class can ask questions or provide feedback after each presentation.
