 - a) giraffe
 - b) ostrich
 - c) cheetah
 - d) tiger
4. The _____ has a distinctive howl.
 - a) wolf
 - b) ostrich
 - c) rat

d) octopus

5. Which animal is not a mammal?

- a) wolf
- b) lion
- c) rat
- d) octopus

Picture 3

6. An octopus can change its colour to blend with its surroundings. (True / False)

7. The _____ is often associated with darkness and danger.

- a) scorpion
- b) wolf
- c) rat
- d) ostrich

8. What is the average lifespan of mice?

- a) They can live between 10 and 18 days.
- b) They can live between 10 and 18 years.
- c) They can live between 12 and 18 months.
- d) They can live between 12 and 18 weeks.

9. Which animal is known for its keen sense of smell and ability to communicate using scents?

- a) Wolf
- b) Ostrich
- c) Rat
- d) Scorpion

10. Which animal uses its tentacles to catch prey and defend itself?

- a) Wolf
- b) Ostrich
- c) Rat
- d) Octopus

Section B

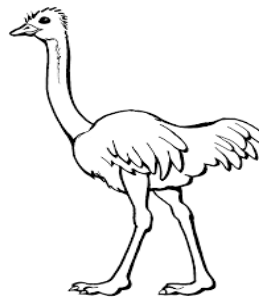

Answer all the questions below.

1. Imagine you are going on a wildlife adventure. Choose one animal mentioned in the previous lessons and describe why you find it interesting. What are some unique characteristics or abilities of this animal?

2. If you could have any animal as a pet, which one would you choose? Describe the animal's appearance, behaviour, and why you think it would make a good pet. How would you take care of this animal?

Picture 4

Picture 5

3. Look at the two animals above and compare their characteristics and habitats. How are they similar or different? Explain why each animal is suited to its specific habitat.

Section C

Activity: Animal Presentation

Instructions:

1. Choose one animal that you find interesting from the animals discussed in the previous lessons.
2. Collect interesting facts about its appearance, habitat, diet, and unique characteristics.
3. Create a visual presentation to showcase your research.
4. In your presentation, cover the following aspects of your chosen animal:
 - a) Introduction: Introduce the animal and provide some general information about it.
 - b) Appearance: Describe the physical features and adaptations of the animal.
 - c) Unique Characteristics: Highlight any interesting or unique traits that make the animal special.
 - d) Fun Fact: Share an exciting or surprising fact about the animal.
5. Present your research to your classmates or record a video presentation.

Answer Scheme
Worksheet
English Year 5
Unit 3: Wild Life

Section A

1. a) looks
2. False
3. b) Ostrich
4. a) wolf
5. d) Octopus
6. True
7. a) scorpion
8. c) They can live between 12 and 18 months.
9. a) Wolf
10. d) Octopus

Section B

Sample Answers

1. I find the octopus interesting because of its ability to change colours and camouflage itself. This unique characteristic helps the octopus hide from predators and sneak up on prey. It can blend in with its surroundings, making it a fascinating and clever animal. (Or any suitable answers by students)
2. If I could have any animal as a pet, I would choose a pet rat. Rats are intelligent and can be trained to perform tricks. They are also social animals and enjoy interacting with their owners. I would provide my pet rat with a spacious cage, plenty of toys and tunnels to explore, and a balanced diet. I would spend time playing with my pet rat and providing it with love and attention. (Or any suitable answers by students)
3. The wolf and the ostrich have distinct characteristics and habitats. The wolf is a carnivorous mammal that lives in packs and hunts in forests or open plains. It has sharp teeth and powerful legs for running and capturing prey. On the other hand, the ostrich is a flightless bird that inhabits open grasslands and deserts. It has long legs for running and a strong beak for finding food. While the wolf is a predator that hunts in groups, the ostrich is a herbivore and relies on its speed and camouflage to avoid predators. Both animals have adapted to their habitats in different ways, showcasing the diversity of wildlife. (Or any suitable answers by students)

Section C

Any suitable answers by students.
